

Differential pressure switches for air, flue and exhaust gases

Pressure switch for gas

DUNGS®
Combustion Controls

LGW...A4
LGW...A4/2

5.08

Technical description

The differential pressure switch LGW... A4 is an adjustable differential pressure switch as per EN 1854 for automatic burner controls.

It is suitable for switching a circuit on, off or over on changes in actual pressure value relative to the set reference value.

The reference value (switching point) is adjusted on a setting wheel provided with a scale. The test nipple is integrated in metal housing as standard.

Application

Differential pressure monitoring in firing, ventilation and air-conditioning systems. Differential pressure switches: suitable for air, flue and exhaust gases. Pressure switches: suitable for gases of families 1,2,3 and other neutral gaseous media.

Approvals

EC type testing certificate as per:

- EC-Gas Appliances Regulation
- EC-Pressure Equipment Directive

Pressure switch Class "S" as per EN 1854.

Approvals in other important gas-consuming countries.

Functional description

Differential pressure switch in pressure and vacuum ranges. The differential pressure acts via the diaphragm against the force of the setting spring on the microswitch. The pressure switch operates without any auxiliary power.

**Differential pressure switch
LGW...A4**

The switching mechanism responds to differential pressure which acts between the two pressure chambers. It switches an electric circuit on, off or over when the set reference value is exceeded or undershot.

Overpressure switch LGW...A4

Pressure connection G 1/4

Single-acting pressure switch in the overpressure range.

The switching mechanism responds if there is an overpressure which switches on, off or over to an electric circuit if the set reference value is exceeded or undershot.

The pressure connection G 1/8 may not be closed.

Vacuum switch LGW...A4

Pressure connection G 1/8

Single-acting pressure switch in the low pressure range. The switching mechanism responds to vacuum which switches an electric circuit on, off or over when the set reference value is exceeded or undershot.

The pressure connection G 1/4 may not be closed.

LGW...A4 switching function

As pressure rises:

1 NC opens, 2 NO closes

As pressure falls:

1 NC closes, 2 NO opens

Definition of switching difference Δp

The switching difference Δp is the pressure difference between the upper and lower switching pressures.

LGW...A4, Design: Clear cover

Protection class: IP 54

IP 54

- 5** Protection against ingress of solid particles ≥ 1 mm.
Protection against access to hazardous parts using ≥ 1 mm wire
Complete contact protection
- 4** Protection against a water jet.
No hazardous conditions may result.

LGW...A4/2, Design: Metal housing

Protection class: IP 65

IP 65

- 6** Protection against the entry of dust (dust sealed).
Protection against access to hazardous parts using ≥ 1 mm wire
Complete contact protection
- 5** Protection against a water jet from a nozzle directed at the unit (housing) from any directions
No hazardous conditions may result (water jet).

Specifications

Max. operating pressure	LGW 3 A4 - LGW 150 A4 LGW 3 A4/2 - LGW 150 A4/2	500 mbar (50 kPa) 500 mbar (50 kPa)

Electrical connection	Standard Special design	at screw terminals via M20 x 1.5 cable gland plug connection for line sockets as per DIN EN 175 301-803, 3-pin with protection contact
Degree of protection	LGW...A4 LGW...A4/2	IP 54 as per IEC 529 (EN 60529), (transparent hood) IP 65 as per IEC 529 (EN 60529), (metal housing)
Adjustment	If pressure increases in vertical installation position. Optionally adjustment for rising or falling pressure possible on site. If installation position deviates, note change in switch point.	
Setting tolerance	±15% switch point deviation referred to reference value and installation in vertical position. Optionally, rising (↑) or falling (↓) adjustment possible on site.	
Deviation	Permissible deviation of the set value $\leq \pm 15\%$ in the service life test according to EN 1854	
Reference value setting device	Standard: blue Version "Y": Yellow	

Dimensions [mm]

LGW... A4

LGW... A4/2

with metal housing,
cable gland M 20 x 1.5

LGW... A4/2

with metal housing, plug-in connection for
sockets accord. to DIN EN 175 301-803

Installation position

Standard installation position

In case of deviations, observe the changes in switching point

When installed horizontally, the pressure switch switches at a pressure higher by approx. 0.5 mbar

When installed horizontally overhead, the pressure switch switches at a pressure lower by approx. 0.5 mbar

When installed in an intermediate installation position, the pressure switch switches at pressure deviating from the set reference value by max. ± 0.5 mbar.
